Journal of Graph Theory

Contents of Volume 10, 1986

Number 1, Spring 1986

The Crossing Number of $K_{1,3,n}$ and $K_{2,3,n}$
K. Asano 1

Connectivity of Circulant Digraphs
E. A. van Doorn 9

Bijective Proofs of Two Broken Circuit Theorems
A. Blass and B. E. Sagan 15

Existence of Spanning and Dominating Trails and Circuits
H. J. Veldman 23

Families of Graphs Complete for the Strong Perfect Graph Conjecture
D. G. Corneil 33

Asymptotic Enumeration of Labeled Multigraphs by Vertices, Edges, and Degree Parities
E. A. Bender and L. B. Richmond 41

Bipartite Density and the Independence Ratio
S. C. Locke 47

Minimal *k*-Saturated and Color Critical Graphs of Prescribed Minimum Degree
D. A. Duffus and D. Hanson 55

One-Legged Caterpillars Span Hypercubes
I. Havel and P. Liebl 69

Minimum *k*-Hamiltonian Graphs, II
M. Paoli, W. W. Wong, and C. K. Wong 79

On the Domination of the Products of Graphs II: Trees
M. S. Jacobson and L. F. Kinch 97

Parity Theorems for Paths and Cycles in Graphs
J. A. Bondy and F. Y. Halberstam 107

The Six Bidecomposable Graphs
K. Ando and H. Mizuno 117

The Longest Cycle of a Graph with a Large Minimal Degree
N. Alon 123

On q-Trees
C.-Y. Chao, N.-Z. Li, and S.-J. Xu 129

Information for Contributors 137

Number 2 Summer 1986

A Generalization of Edge-Coloring in Graphs
S. L. Hakimi and O. Kariv 139

On Digraphs with the Odd Cycle Property
R. Manber and J. Shao 155

On Iterated Clique Graphs with Increasing Diameters
C. Peyrat, D. F. Rall, and P. J. Slater 167

Existence of Graphs with Prescribed Mean Distance
G. R. T. Hendry 173

Node Coverings with Odd Chains
D. de Werra 177

Defective Colorings of Graphs in Surfaces: Partitions into Subgraphs of Bounded Valency
L. J. Cowen, R. H. Cowen, and D. R. Woodall 187

Applying a Proof of Tverberg to Complete Bipartite Decompositions of Digraphs and Multigraphs
D. Pritikin 197

Saturated Graphs with Minimal Number of Edges
L. Kászonyi and Z. Tuza 203

Orientations of Hamiltonian Cycles in Large Digraphs
A. P. Wojda 211

Some Large Graphs with Given Degree and Diameter
I. Alegre, M. A. Fiol, and J. L. A. Yebra 219

Even Graphs
F. Göbel and H. J. Veldman 225

A Class of Self-Complementary Vertex-Transitive Digraphs
G.-L. Chia and C.-K. Lim 241

Strongly Balanced Graphs and Random Graphs
A. Ruciński and A. Vince 251

Number 3, Fall 1986

Editorial: Changing of the Guard
Frank Harary i

Editorial Note: Graph Theory as Applied Mathematics
Frank Harary iii

Title page v

An Eulerian Trail Through Königsberg
R. J. Wilson 265

An Eulerian Exposition
L. Lesniak and O. R. Oellermann 277

What is the Smallest Number of Dicycles in a Dicycle Decomposition of an Eulerian Digraph?
N. Dean 299

Reflections on Graph Theory
C. Thomassen 309

Desert Island Theorems
L. W. Beineke 325

From Topology to Algebra
W. T. Tutte 331

On Unreliability Polynomials and Graph Connectivity in Reliable Network Synthesis
F. T. Boesch 339

Some Genuine Graph Models in Anthropology
P. Hage and F. Harary 353

The Nonorientable Genus is Additive
D. Archdeacon 363

The Orientable Genus is Nonadditive
D. Archdeacon 385

An Inequality Involving the Vertex Arboricity and Edge Arboricity of a Graph
S. A. Burr 403

A New Sufficient Condition for Hamiltonian Graphs
P. Fraisse 405

On Circuits and Pancyclic Line Graphs
A. Benhocine, L. Clark, N. Köhler, and H. J. Veldman 411

Information for Contributors 427

Number 4, Winter 1986

Stability, Domination and Irredundance in a Graph
O. Favaron 429

Equimatchable Factor-Critical Graphs
O. Favaron 439

A Theorem on Paths in Planar Graphs
N. Chiba and T. Nishizeki 449

Minimal Ordered Triangulations of Surfaces
Z. Magajna, B. Mohar, and T. Pisanski 451

Representing Groups by Graphs with Constant Link and Hypergraphs
W. Vogler 461

Largest Bipartite Subgraphs in Triangle-Free Graphs with Maximum Degree Three
J. A. Bondy and S. C. Locke 477

Some Results on Linear Arboricity
F. Guldan 505

Absolutely 3-Chromatic Graphs
A. B. Evans 511

A Generalization of Plantholt's Theorem
A. J. W. Hilton 523

A Criterion for the Planarity of a Graph
J. R. Breitenbach 529

A Mengerian Theorem for Paths of Length at Least Three
Michael Hager 533

A Note on Chromatic Uniqueness of Graphs
G. L. Chia **541**

On the Structure of Hereditary Classes of Graphs
E. R. Scheinerman **545**

Circuits Including a Given Set of Vertices
P. Fraisse **553**

Author Index **559**

Information for Contributors **561**

Volume Contents **iii**
